Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

This Office action is in response to the applicant's amendment filed on 1/20/2007.

Status Of Claims

The applicant has canceled claims 5-6.

Claims 1-4 and 7-9 have been examined.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 5,551,204 to Mayrand.

Claims 1 and 4:

Mayrand shows in Figure 3, a structure comprising a sheet member 11 having an upper surface and a bottom surface, a plurality of channels 12" formed in the sheet member 11, said channels 12" extending inwardly from said bottom surface, at least one channel 12" defined by first and second sidewalls 15 and a bottom wall 12, each of said side walls 15 and bottom wall being straight and planar, each of said side walls being angled (see Fig. 4) with said upper surface of said sheet member, said at least one channel having a plurality of apertures

Art Unit: 3635

16 formed in at least one of said sidewalls 15. Mayrand teaches the basic structures for the sheet member as stated but does not specifically teach the angle formed by the sidewalls and the upper surface is an acute angle or between 75-88-degrees. The specific configuration of the angle, that is, acute or obtuse or the specific angle of 75-88-degrees does not appear critical to the claimed invention. Applicant's disclosure indicates no criticality to the angle of the sidewalls. It would appear that Mayrand's obtuse angle would perform equally as well and constitutes an obvious variation of applicant's claimed angle.

Claim 2:

Each of said channels has apertures 16 formed in at least one of said sidewalls 15.

Claim 3:

Wherein all of said sidewalls 15 have apertures 16 formed therein.

Claim 7:

Wherein said sheet member 11 is formed of a steel sheet (col. 3, line 678) thus it is a metallic material.

Claim 8:

Mayrand teaches the basic structures for the sheet member as stated above; but Mayrand does not teach specifically the metallic material is aluminum. However, this feature would have been a matter of obvious design choice to one of ordinary skill in the art at the time the invention was made to have a channel sheet made out of aluminum for corrosive-free and lightweight purposes. Furthermore, applicant has not disclosed the criticality of this feature.

Art Unit: 3635

Claim 9:

Wherein said channels 12" extend transversely of said sheet member 11.

Response to Arguments

Applicant's arguments with respect to claims 1-4 and 7-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
